

NEW! Eaton Power Protect Services for E-Rate

Ensure reliability of your IT equipment with comprehensive coverage from Eaton's Power Protect for our 5PX and 9PX models.

With the growing demand for UPS power in K-12 and higher education, Eaton has combined our 5-year onsite service, startup, and removal/disposal with an Eaton UPS to give you one part number and peace of mind.

Eaton understands the constraints that IT and maintenance employees are facing with being pulled in different directions. Eaton is here to help alleviate the guess work around when service is needed on your Eaton UPS equipment and will dispose of the old equipment in an environmentally friendly way. The best part is that on average, 44-52% of the total cost is E-Rate eligible.

Benefits:

- ✓ Take the guesswork out of the deployment and maintenance on the UPS equipment
- ✓ Peace of mind that your IT investment is protected by an Eaton service plan
- ✓ Access to UPS information by our Brightlayer PredictPulse™ software (optional)
- ✓ Environmentally friendly with the disposal of old equipment
- ✓ Portion is E-Rate eligible
