

**Eaton's Arrow Hart**

Water/Wastewater treatment facilities line card

**Resilient, safe, efficient**  
Wiring devices built for water and  
wastewater treatment facilities

**Arrow Hart**

## Keep water flowing

Water and wastewater treatment facilities require unique wiring devices built to protect against water intrusion and corrosion while providing power safely to users and equipment. Keep water flowing with the use of Eaton's Arrow Hart devices.

## Water/Wastewater treatment facilities line card

### Office areas

Maximize productivity, energy savings and protection within office spaces with the help of the correct wiring device. **USB charging receptacles** keep smart devices charged and ready for use, while **occupancy sensors** help to manage energy consumption. **Surge protected receptacles** add an additional layer of protection for delicate electronic equipment.

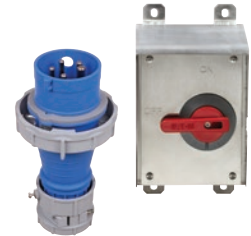

### Maintenance

Prepare and perform routine and required maintenance with the use of **Arrow Hart's color coded locking devices** which ensure a safe and reliable connection. By using a **Rhinobox temporary power center** and **in-line GFCI**, users are able to safely access power where it is needed most.

### Lift and pump stations

Deliver power safely to lift and pump stations with **Arrow Hart's IP69K rated pin & sleeve devices**. Control ON/OFF loads with our IP69K rated motor control **X-Switch**.

### Methane gas areas

Methane areas must be designed with the upmost concern for safety. Eaton's Arrow Hart family of **Class 1 Div 1 and 2 motor control switches and enclosures** help to protect people and property.

### Processing and storage areas

When considering a device to be used for applications where water exposure and possible intrusion is imminent, our **watertight** products allow users to access and deliver power safely. For processing areas where corrosive purification agents may be used, our **corrosion resistant** family offer reliable protection.
