## Activate easyE4 root certificate

To do that, proceed as follows:
settings -> general -> about -> certificate trust settings

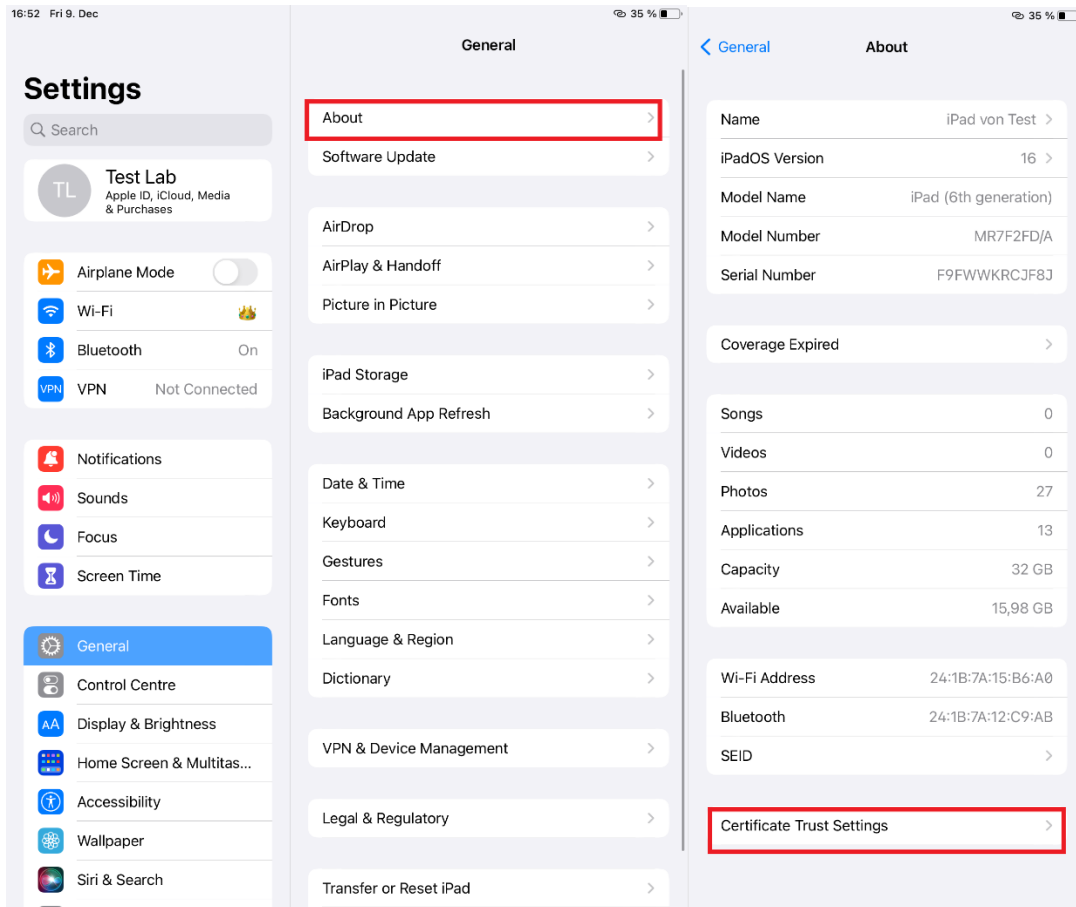

1. Activate by switching on easyRoot CA V1.0.

2. Confirm by clicking next.

Root Certificate

Warning: enabling this certificate for websites will allow third parties to view any private data sent to websites.

| Cancel | Continue |

2 Where on my device can I find the installed easyE4 root certificate?

1. To find the installed certificate proceed as described: settings -> general -> about -> certificate trust settings
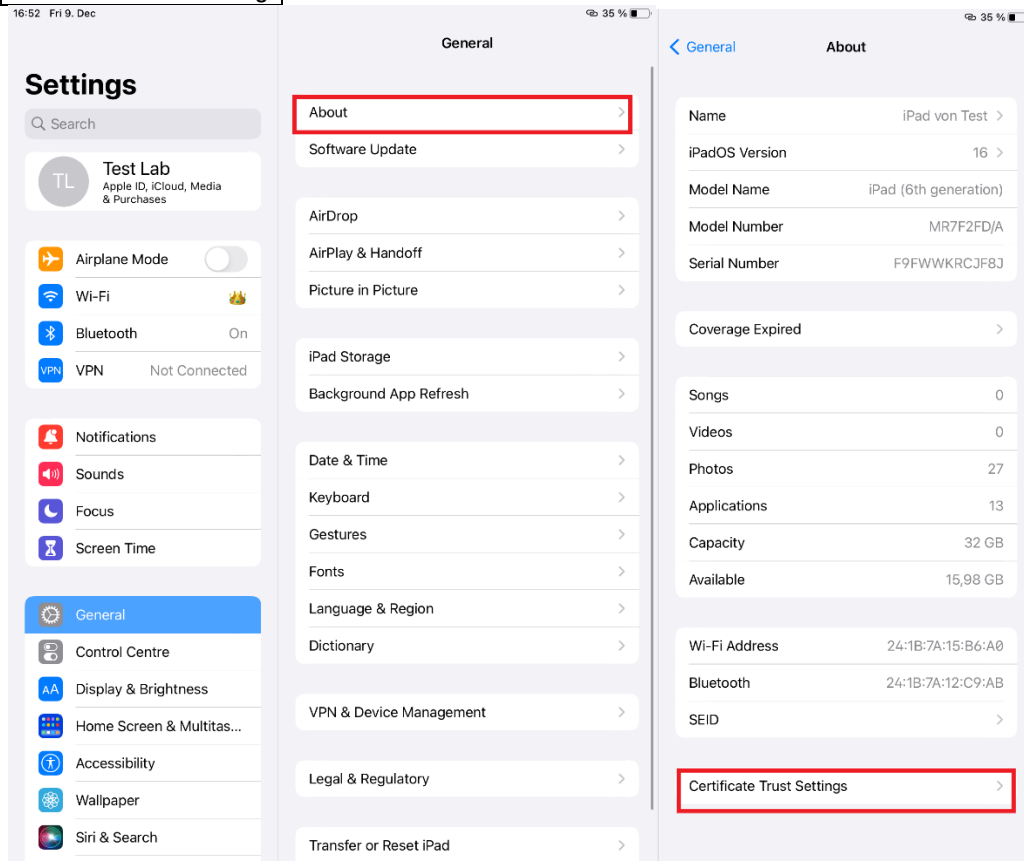

2. To check the certificate, open the browser and establish a secure connection to the easyE4 base device by entering the HTTPS protocol and the IP address of the device, e.g. https://192.168.119.75. You can see from the lock that the certificate has been successfully installed.

→	If no connection is established, check the device time of the easyE4. Due to the incorrect device time, a TLS certificate (level 4) may be generated whose validity has already expired or is in the future.

Eaton is an intelligent power management company dedicated to improving the quality of life and protecting

the environment for people everywhere. We are guided by our commitment to do business right, to operate

sustainably and to help our customers manage power – today and well into the future.

By capitalizing on the global growth trends of electrification and digitalization, we're accelerating the planet's transition to renewable energy, helping to solve the world's most urgent power management challenges, and doing what's best for our stakeholders and all of society.

Founded in 1911, Eaton has been listed on the NYSE for nearly a century.

We reported revenues of $19.6 billion in 2021 and serve customers in more than 170 countries.
